**ConnectDavie** is an initiative of the Davie County Health Department to improve active living opportunities through the creation of a county-wide system of multi-use greenways. This plan aims to provide meaningful connections to Davie County’s treasured assets, including its towns, neighborhoods, schools, recreation facilities, historical and cultural resources, and other areas deemed worthy by local citizens. The ConnectDavie plan is critical for not only determining priority areas for implementation, but also for communicating to grant agencies that can help fund construction.
